

WE ARE HIRING!

Medical Laboratory Technologist

SLIBTEC is a high-tech ecosystem fostering innovation through cutting-edge technologies, dedicated facilities, and a vibrant research culture. It provides a linear research and development manufacturing platform for the biotechnology business.

Responsibilities

- Perform diagnostic laboratory tests in Molecular Biology, Immunology, and Microbiology.
- Handle and process clinical specimens with precision, care and confidentially
- Operate and maintain specialized laboratory equipment.
- Ensure compliance with safety, biosafety, and quality control protocols.
- Familiarity with laboratory information systems (LIS), medical record documentation and assist in preparing reports.
- Adherence to standard operating procedures (SOPs) and regulatory guidelines of SLIBTEC.

We are looking for a Medical Laboratory Technologist

- Degree in Medical Laboratory Technology from a recognized institution.
- Valid registration as a "Medical Laboratory Technologist" from the Sri Lanka Medical Council (SLMC) and Ceylon Medical College Council (CMCC).
- Prior experience in Molecular Biology, Immunology, or Microbiology techniques is preferred.
- On a full-time basis, with the flexibility to work extended hours when necessary

Competencies and Skills

- Language proficiency in English with a high level of written and verbal communication skills.
- Good time management and exceptional organizational skills
- Teamwork, collaboration and building effective relationships
- Proficiency in managing multiple tasks and handling confidential information
- High level of integrity, confidentiality, and ethical standards.
- Willingness to engage in continuous learning and professional development.
- Knowledge of health and safety responsibilities

Please email your CV including two non-related referees, mentioning the position in the subject line, before
15th March 2026.
