

WE ARE HIRING!

Junior Research Associate - Genomics

SLIBTEC is a high-tech ecosystem fostering innovation through cutting-edge technologies, dedicated facilities, and a vibrant research culture. It provides a linear research, development and manufacturing platform for the biotechnology business.

Launch Your Career at the Frontier of Genomics!

Are you passionate about

Genetics, Molecular Biology, and Genomic Technologies?

Looking for the perfect opportunity to build your expertise in cutting-edge sequencing techniques?

Join Our Team and Shape the Future of Genomics.

As a Junior Research Associate, you will gain hands-on experience with:

- Next Generation Sequencing (NGS)
- Sanger Sequencing
- Exome Sequencing

Work alongside world-class scientists in a dynamic, collaborative research environment where innovation and discovery are part of everyday life.

Who Should Apply?

Candidates with a strong background in sequencing technologies and hands-on experience operating sequencing platforms such as **NextSeq**, **MiSeq**, or **Sanger Sequencing** are encouraged to apply.

Why Join Us?

Turn your passion for genetics into tangible discoveries while mastering advanced sequencing workflows. This is your opportunity to contribute to groundbreaking research and build a strong foundation for a successful career in genomics.

Please email your CV including two non-related referees, mentioning the position in the subject line, before
10th July 2026
