

WE ARE HIRING!

Project Technician

SLIBTEC is a high-tech ecosystem fostering innovation through cutting-edge technologies, dedicated facilities, and a vibrant research culture. It provides a linear research, development and manufacturing platform for the biotechnology business.

We are Looking for:

- Minimum of 10 years' laboratory experience in biomedical, immunology, microbiology, or clinical research
- Experience in blood sample processing and biological specimen handling
- Experience performing ELISA or related immunoassays
- Previous experience in HIV, immunology, or infectious disease research and PBMC isolation and cryopreservation techniques would be added advantage

Responsibilities:

- Laboratory Sample Processing
 - Perform separation of plasma and peripheral blood mononuclear cells (PBMCs) from human blood and prepare specimens for downstream analyses
- Laboratory Testing
 - Perform immunoassays as per standard operating procedures
 - Assist with laboratory quality control, including calibration and maintenance of equipment
 - Maintain accurate records of reagent preparation, assay performance, and quality control results
- Sample Storage & Biobanking
 - Cryopreserve specimens in accordance with approved study protocols
 - Maintain sample inventory records
- Documentation, Quality Assurance & Biosafety
 - Maintain complete laboratory documentation, including specimen receipt logs, processing records, and assay documentation
 - Ensure compliance with Good Laboratory Practice (GLP), institutional biosafety procedures, and Ethics Review Committee requirements
- Administrative Support
 - Assist with inventory management of laboratory consumables, reagents, and study supplies
 - Support the Principal Investigator and laboratory supervisors during study monitoring visits and interim reporting

Competencies and Skills:

- Knowledge of laboratory documentation and quality management procedures
- Demonstrated ability to maintain strict confidentiality of participant information
- Ability to work independently and as part of a multidisciplinary research team
- Knowledge of Good Clinical Practice (GCP), Good Laboratory Practice (GLP), and research ethics
