

WE ARE HIRING!

Junior Research Associate - Biodevices

SLIBTEC is a high-tech ecosystem fostering innovation through cutting-edge technologies, dedicated facilities, and a vibrant research culture. It provides a linear research, development and manufacturing platform for the biotechnology business.

Responsibilities:

- Timely record keeping in the laboratory record book on all laboratory experiments and results
- Assist in identifying funding sources and preparing grant proposals
- Perform literature reviews to gather relevant information and stay updated with field developments
- Organize and manage research data, ensuring accurate documentation and compliance
- Prepare research findings for high-impact journals and any intellectual property
- Assisting in organizing workshops, seminars, and training programs
- Follow SLIBTEC research policies and ethical standards
- Provide regular progress reports to the research team leader
- Ensure proper functioning of laboratory equipment with all necessary calibrations
- Prepare the laboratory for safety and GLP audits, ensuring regulatory compliance
- Participate in internal audits and implement corrective actions
- Execute routine quality control procedures for research accuracy
- Safeguard and maintain the confidentiality of research data
- Recover the laboratory record book documenting experiments and results
- Working knowledge of designing, implementing, and innovating software solutions for developing bio-device and their applications
- Assist in method validation programs by testing and verifying new methodologies
- Validation and testing of biomedical and any other related devices
- Ability to prepare technical documents and reports
- Conducting research, development, and prototype design activities related to medical and other technology-based devices

We are looking for:

- A minimum of 6 months of experience in a related field would be an added qualification
- Bachelor's degree in Mechatronics, Biomedical Engineering, a related field, or equivalent qualifications.
- Excellent communication capability with a high level of written and verbal skills
- Exceptional organizational skills and attention to detail
- The ability to anticipate potential pitfalls and proactively solve problems
- Technical understanding of biotechnological processes and innovation concepts
- Knowledge of Microsoft Office and other office-related packages
- Teamwork and collaboration

Please email your CV including two non-related referees, mentioning the position in the subject line, before

29th August 2026
